Halogen, LED and Tungsten bulb Trade price list

Feb 2009

Classic and Vintage Bulbs is a specialist in classic automotive lighting. We focus on providing a consistent high quality ongoing service to our customers.

Classic and Vintage Bulbs has been able to establish and continue its business through the undertaking of research in the development of new products. All of which have been tested to ensure they meet the high standards of the classic and vintage market.

Our products are proudly sold world wide through a number of agents and dealers.

Prices and specifications subject to change with out notice

Please Note: Before Ordering

Halogen Bulbs

The majority of our specialist Halogen bulbs are designed to operate with original generating systems.

Our 6 volt bulbs operate at their best, between 6.5 and 7 volts and 12v bulbs between 12.5 and 14 volts. If your vehicle has electrics that have been modified or updated with an alternator or up rated generating system, please inform us when ordering.

On some smaller vehicles with 6 volt systems, check the output of the generator to make sure it has enough power to handle the extra amperage that some of these bulbs require.

If in doubt to the bulb that may be suited to your vehicle, please contact us with the year and make of your vehicle, generating system and voltage, then peruse the bulb base diagram at the rear of this booklet to identify the base type.

No liability will be accepted for bulbs that have been exposed to voltages in excess of those originally recommended by the vehicle manufacturer.

LED (Light Emitting Diode)

Our **12v LED bulbs** are a special –ve earth (ground) version that replaces a standard stop/tail or indicator bulb. The light emitted by these LED's lends them for use in lamps that have a built in reflector or for applications where light needs to be visible from the side of the lamp. The amber Indicator LED's need a pure electronic flasher relay to make them flash.

Our **6v LED bulbs** are available in –ve and +ve earth and are specifically made for use in tail lamps that have a rearward facing bulb holder and include a number plate aperture. They are designed with rear ward facing red LED's and white around the perimeter. These LED's are perfect for most 1930's vehicles and motorcycles

LED bulbs use less than 1/10th the current of a normal bulb.

With all the above information supplied, we will endeavor to provide you with a suitable bulb.

Watts vs. Candle Power As a guide, the following comparisons can be made between these 2 measurements of power or brightness:

2w = 3cp

10w = 15cp

25w = 32cp

6w = 6cp

16w = 21cp

35w = 50cp

6 volt Head & Spotlight Bulbs Halogen

Watt	Base	Original #	Price	Application
35w	Ba15s	75,1133	\$24	Headlamps 1920's to 40's etc Also for mechanical or resistance dip systems
35w	Ba15d	109,1134	\$25	
25/25w	BPF	166	\$25	Lucas 7" Semi sealed reflectors (700 series)
35/35w		356	\$25	
60/55w			\$25

Halogen Headlight Conversion Kits

Type	Price	Application
7" semi-sealed. Curved glass with 12v 60/55 halogen	\$90pr	A replacement for sealed beam or 7" semi - sealed light units. With or without park light fitting Halogen Bulbs included.
7" 6 volt c/w 60/55 or 35/35w halogens	\$115pr	
Rectangular Lucas type.	POA	As fitted to Ford Capri, Valiant etc. With park light fitting.
P700 Tripod with P43t Halogen fitting	\$120ea	A faithful reproduction. Will fit in most 7" applications. MG, Triumph, Healey, Jag etc. (Halogen bulb extra)

7"

Sealed Beams

Type	Price	Application
7" sealed beam	\$35 ea	6v 40/50w For 6v applications 6006

7" LUCAS British Pre-focus Headlights

Type	Price	Application
7" semi-sealed. Curved glass. Block pattern	\$80ea	7" semi -sealed units. (British Pre-Focus bulb type) Genuine Lucas

Other Parts Available

	Price	Application
Flasher switch, Column Fit	\$48 /\$55	Universal with or without Green bulb
6v Flasher relay	\$12-\$18	2 or 3 pin
Flasher relay socket	\$10	Fitting kit
6v Relay 4 terminal	\$19	Suitable for lights/ horns
12v Relay 4 terminal	\$6	Suitable for lights/ horns

Reflector Re-Silvering

A reflector re-silvering service is available.

We refinish your headlamp reflectors in pure silver **NOT EPNS, Chrome** or other finishes. **Yes PURE SILVER!**

This will give your lamps years of service, even with regular polishing. Call us for a quote.

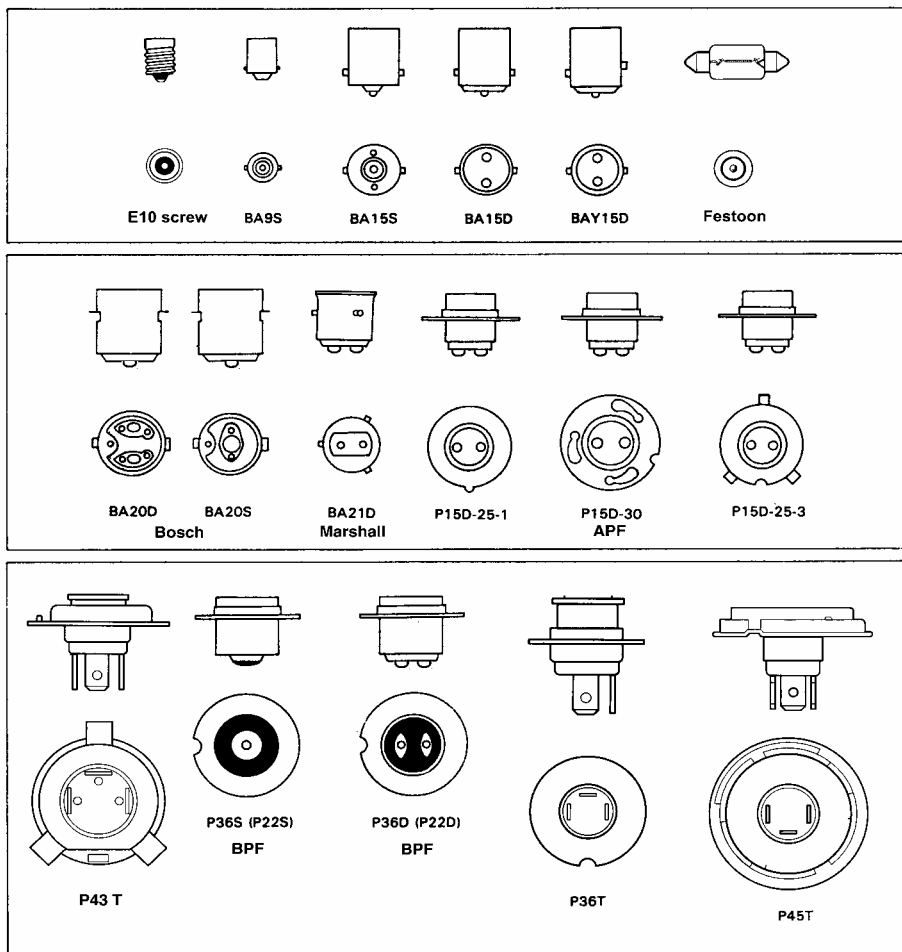

Postage and Packaging

Please add the following to cover post and pack; (Australia only)
(Allow 7 days delivery)

1-4 light bulbs	\$6.00	up to 250 gms
5-10 light bulbs	\$9.00	250-500 gms

Other articles charged by weight, size and distance.

12 volt LED

Light Emitting Diode

Color	Base	Replaces	Price	Application
Red	Ba15d	Stop/tail	\$25	Replaces normal stop/tail bulbs -ve ground
Red	Ba15d	Stop/tail	\$27	As above with Equal pin base
Amber	Ba15s	Indicator	\$25	Indicator bulb -ve ground
White	Ba15s	Parklight	\$15	Replaces normal tail bulbs -ve gnd
White	Ba15s	Parklight	\$18	As above but +ve ground
White	Ba15d	Parklight	\$18	Park bulb with double contact base
Pure electronic Flasher relay			\$20	For use with LED indicators above

6 volt LED

Light Emitting Diode

Color	Base	Replaces	Price	Application
Red	Ba15d	Stop/tail	\$35	Replaces normal stop tail bulbs -ve earth, offset pin base
Red	Ba15d	Stop/tail	\$35	As above for +ve earth
Red	Ba15d	Stop/tail	\$35	Replaces normal stop tail bulbs -ve earth, equal pin base
Red	Ba15d	Stop/tail	\$35	As above for +ve earth

Advantages of LED Bulbs

Very low current drain typically less than 1/10 of a normal bulb, Long lasting 100,000 hrs +, Virtually vibration proof, Instant burn up time of around 30milli sec. compared to about 300 for normal bulbs. This equates to longer braking distances for following drivers reducing the chances for rear end collisions.

Notes when using LED bulbs

LED lamps draw so little current a pure electronic flasher relay will be needed to flash indicators at the correct rate.

LED's are polarity sensitive, so make sure the vehicles polarity matches the selected bulbs.

Our Red 6v LED's are designed for lamps where the bulb faces directly to the rear.
